Electric hydraulic pump Torque tools

→ KLV4000 Series

Features + Benefits

For fast and reliable performance, value for money and safety the KLV4000 Series range is hard to beat.

- 1 Highly efficient compact 3 stage pump which provides fast, efficient and controlled operation.
- 2 Integrated cooling system for continuous use and temperature control.
- 3 Choice of valve assemblies to allow use of up to 4 hydraulic tools simultaneously.
- 4 Fitted with pressure control valve and gauge to allow precise tool control.
- 5 Corrosion resistant Aluminium tank and frame for use in harsh environments.
- 6 6 metre cable pendant control unit.
- 7 KLV4000 FP-4 four unit valve assembly
- 8 Pressure relief button-fixed to the solenoid; allowing manual release of pressure in the event of loss of power to the pump.

As a compact lightweight design, the KLV4000 Series range of electric hydraulic pumps are quiet, versatile, safe and efficient; suitable for a wide range of hydraulic powered tool applications. The FP-4 valve head option allows up to 4 hydraulic tools to be used simultaneously; improving efficiency and job costs. Designed with a highly efficient radiator cooling system; the KLV4000 Series range is suitable for extended periods of use. Fitted with a fully adjustable pressure control valve which delivers operating pressures from 40-700 Bar; the KLV4000 Series range is the choice for the professional operator.
